

2018 Academic lecture of Seto Inland Sea Regional Research Center was held.

On November 28 (Wednesday), “The Fiscal 2018 Academic Lecture of Seto Inland Sea Regional Research Center” was held at e-topia in BB square.

The Academic Lecture was held by inviting 3 experts in the field of “Sea, Culture / Tourism and Tele-medicine” which our Center has promoting, with 60 participants including general participation.

The lecture themes were as follows.

- “Ecology of paralytic shellfish poisoning plankton *Alexandrium tamarense* in Osaka Bay and large-scale proliferation in the spring of 2018” by Keigo Yamamoto, Senior Researcher, Research Institute of Environment, Agriculture and Fisheries, Osaka Prefecture.
- “History of main fish which has been used in Kagawa Prefecture” by Atsushi Kawanishi, Senior Researcher, Kagawa Prefectural Fisheries Experiment Station.
- “Introduction of global deployment of medical ICT at BHN” by Hachihei Kurematsu, Director, NPO BHN Association.
(BHN means Basic Human Need).

In the question-and-answer session after lectures, active opinions were exchanged.

Greeting from Center Director Tada

Senior Researcher, Yamamoto

Senior Researcher, Kawanishi

Director Kurematsu
