Research Keywords

Product Design, Innovation, Local Industry, 3D CAD, Prototyping

Our industry and economy, culture and lifestyle are expected to change drastically, and traditional manufacturing is at a time of great change. From traditional manufacturing such as craftsmanship and local industries to advanced manufacturing such as robots and personal mobility, future designers will need new suggestions to solve problems and create new value. In Ifuji lab, we will research and develop new product designs by using traditional technologies and new technologies such as 3D CAD and 3D printers.
