

Confirmed Cases of COVID-19

Following the announcements of COVID-19 patients since December 16, 2020, we hereby report that another Kagawa University student has tested positive for COVID-19. This student was a close-contact person of one of the students who had been previously identified as a COVID-19 patient. Initial PCR test results showed that the student was negative, and the student was under self-quarantine. Upon reexamining the student, the student tested positive.
