

Remote doctors watch over pregnant women under home medical care.

In Chiba Prefecture, doctors started to watch over the condition of pregnant women under home medical care of coronavirus disease, from remote.

That is, 6 perinatal maternal and child medical centers commissioned by the Prefecture lend iCTG “petit Mobile Fetal Monitor” to the pregnant women at request of their family doctors, and remote-watch over their conditions. If sign or abnormality of delivery finds, hospitalization adjustment starts promptly.

For this, Chiba Prefecture has introduced the 50 iCTGs.
